# PRODUCT TECHNOLOGY

## THE ORIGINAL PREMIUM PORTABLE SPA™

As a leading manufacturer of the inflatable, portable hot tub, Lay-Z-Spa® has become an industry staple that consumers know and trust. From technological innovations to style, Lay-Z-Spa leads the market. High-functioning components and safety are the main priorities of the spa line, providing consumers with products they can depend on.

## FREEZE SHIELD™ TECHNOLOGY

### COMFORT IN THE COLD

Freeze Shield™ successfully equips the spa for year-round, all-weather use. Designed with innovative winterizing technology and an improved material, these spas automatically increase water circulation and heating when temperatures are low to prevent the inner parts from damage.

## THERMAL INSULATION

### HIGH ENERGY-EFFICIENCY, LOW ELECTRIC BILL

The EnergySense™ thermal covers and liners retain more heat than PVC material alone. This allows the spa to heat up faster and stay hotter longer, leading to as much as 40% higher energy-efficiency.

## HIGH-TECH COMPONENTS AND DECREASED NOISE

EFFICIENT • DURABLE • SAFE

The internal pump components are designed to work efficiently, while reducing the noise level as much as possible during use. Engineered with a rotor and blade, our pumps are specifically designed to have a soft internal connection, reducing the noise.

## ADVANCED HEATING SYSTEM

By using advanced materials to create our heating mechanism, including aluminum alloys and ceramic, we ensure efficient temperature control. The internal structure is protected by six layers of insulation to prevent electrical damage, ensuring safe use every time.

LAY-Z-SPA.  
HAWAII

# PRODUCT SAFETY

Safety is our top priority when designing and producing our inflatable spas. We are consistently upgrading our products to ensure that consumer safety is never compromised. Currently, Lay-Z-Spa is the only brand on the market that uses this exclusive GDS & GLEDS technology.

## GDS

### GROUND DETECTION SYSTEM

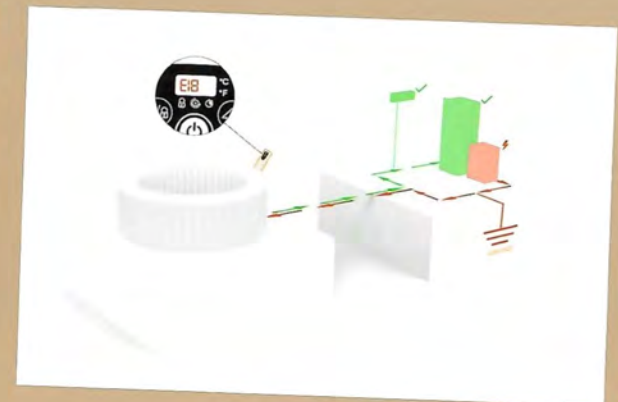

With safety as a priority, every spa is equipped with our advanced, marketleading Ground Detection System, which monitors the energy supply to ensure it is being used safely. If the system detects an issue, the pump alerts the user and does not allow further use until the power supply is correctly earthed.

## GLEDS

### GROUND LINE ELECTRIC DETECTION SYSTEM

Once the spa is plugged in, the system continuously monitor the ground of the electrical system in the house and will advise the user with the E18 code if conditions are unsafe.

# MASSAGE TECHNOLOGY

## AIRJET™ SYSTEM

Soothe your body and relax your mind with the touch of a button! The AirJets work by releasing warm air into the water, surrounding you with a calming bubble massage.

## AIRJET PLUS™ SYSTEM

Enjoy a deeper massage with AirJet Plus! Air bubbles are released from both the perimeter and center of the bottom of the spa to target both the legs and back.

## HYDROJET PRO™ SYSTEM

HydroJet Pro is the best of both worlds! Adjustable nozzles along the inside walls of the spa release soothing jetstreams of water, while jets along the bottom release a calming flow of air bubbles specifically targeting your feet and back.

# MATERIAL TECHNOLOGY

## BEAM CONSTRUCTION DELIVERING STRENGTH AND COMFORT

The internal construction of each spa is designed to offer superior structural stability while still maintaining a comfortable surface. It always provides a luxurious spa experience, no matter how many times it's inflated or deflated.

## MAXHOLD™ MATERIAL DURABLE COMFORT

MaxHold™ internal beams maintain their shape over time, enabling the spa to hold its intended pressure and sturdiness. Made from a durable fabric material rather than PVC, they set the standard for internal stretch-resistance in the spa market.

## FORTIFIBER™ MATERIAL DROP STITCH DURABILITY

Inflated walls made from FortiFiber™ material provide unparalleled strength. Thousands of fine threads securely connect the sidewalls, which seal in air to create a rigid and sturdy spa. Not only great for durability, but this also makes the spa more spacious on the inside.

## SPA MATERIAL CONSTRUCTION

### WALL AND TOP RING

Our spas feature DuraPlus™ 3-ply material that makes up the external layer of the hot tub. The material is an exclusive formula of mesh encased in PVC to increase the strength, puncture-resistance and overall longevity of the spa.

# NEW SPA NAMING CONVENTIONS

For streamlined alignment within the spa category, we updated the naming conventions to be determined by 3 major factors.

## 1. FAMILY GROUPS

THE OFFICIAL NAME WILL BE A CITY DETERMINED BY THE SHAPE AND USER CAPACITY:

SHAPE	Round	Round	Round	Round	Square	Oval	Round	Square	Round
USER CAPACITY	2-3 Adults	2-4 Adults	3-5 Adults	4-6 Adults	4-6 Adults	5-7 Adults	5-7 Adults	5-7 adults	6-8 Adults
FAMILY NAME	St. Lucica	Miami	Bali	Paris	Hawaii	Mauritius	Santorini	Maldives	Grenada

## 2. SPECIAL FEATURE

A PRE-DEFINED DESCRIPTOR IS ADDED TO THE NAME BASED ON THE FOLLOWING HIERARCHY:

SPECIAL FEATURE	EnergySense™	Smart	Luxe	Signature
MEANING	Thermal liner	Wi-Fi integration	LED lights	Graphic print

\*If more than one special feature is present on the product, the item will take the name of the highest-ranking feature in the hierarchy.

## 3. MASSAGE SYSTEM

THE NAME OF THE MASSAGE SYSTEM IS ADDED TO THE END OF THE NAME:

MASSAGE SYSTEM	AirJet™	AirJet Plus™	HydroJet™	HydroJet Pro™
----------------	---------	--------------	-----------	---------------

## 4. MATERIAL SERIES

Spa packaging will receive an update to include upgraded callout treatment for premium materials along the right hand side of the front and back panels.

MATERIAL

FortiFiber™ Series

ThermaCore™ Series

MaxHold™ Series

## IMPLEMENTATION

All existing products will be updated to include the Special Feature and Material Series, but they will keep the existing city name.

All new products beginning in the 2024 season will follow the new convention system outlined here.

Some naming conventions may apply to Special Edition spas only.

## MASSAGING BUBBLES ARE THE PERFECT WAY TO UNWIND.

The AirJet Plus™ system releases bubbles from both the bottom and the sidewalls of the spa to target both the legs and back.

## FOOT MASSAGE

The AirJet Plus™ system features additional jets, strategically placed to provide a relaxing foot massage. By placing another circle of massage bubbles in the center of the spa, we are able to target the legs as well as the back of the user.

## MULTI-FUNCTION PUMP

The included spa pump is convenient and accessible, complete with a digital interface and cup holders. This pump inflates the spa, starts the heating and massage systems, and can activate the filtration system. The design also just received a convenient upgrade - spa users can now reach the digital interface from inside the spa. No standing or exiting needed!

# SETUP & MAINTENANCE

WITH THE KEY TOOLS ALREADY INCLUDED, LAY-Z-SPA SETUP IS QUICK & EASY!

After finding a flat area for the spa, it's as easy as 1, 2, 3!

1. INFLATE the spa with the multi-function pump.
2. CONNECT the pump to the spa, and ensure all of the tubes are attached to the correct openings.
3. FILL the spa with water to the indicated level, and enjoy!

Also included with each spa is a chemical dispenser and filter cartridge to keep the water sparkling. Maintaining clean and healthy spa water is important for the user's experience, and also extends the longevity of the spa.

Thanks to a new function available on all spas, the pump can also quickly and conveniently deflate the spa for transport or storage.
